Define the change or goal you are trying to accomplish

Briefly outline the end-state you are seeking to reach onto the blue sticky note below.

What's your desired goal?

What will help you achieve it?

e.g. "To stay relevant, we need to develop virtual versions of our products and services to meet the new demands of our customers."

To ensure our continued relevance, we must modernize our processes by transitioning from physical Post-it notes to a digital platform, enhancing organization, collaboration, and accessibility in our creative team brainstorming sessions.

i.e. What are the key factors supporting and hindering you in achieving your desired goal, and what will you do about them?

Key factors for successfully transitioning from physical Post-it notes to a digital platform include ensuring a user-friendly interface, accessibility across devices and locations, customization to suit team workflows, integration with existing tools, robust collaboration features, and prioritizing security and privacy.
